What this standard covers

This standard specifies the downhole pressure gauge test equipment technical requirements, calibration conditions, the calibration program and calibration methods. This standard applies to new manufacture, use and repair of downhole pressure gauge calibration device after calibration. This standard does not apply to the main piston gauge standard device downhole pressure gauge test equipment calibration.

Document data

International classification (ICS): 75.180.

Chinese classification (CCS): E90.

Estimated length of the Chinese original: 12,192 words.
