What this standard covers

This standard specifies the offshore oil and gas exploration and development operations, abandonment operations technology and information management requirements. This standard applies to the People's internal waters, territorial sea, the contiguous zone, the exclusive economic zone, continental shelf, as well as other sea areas under the jurisdiction of the PRC within the oil and gas exploration, development and production operations. China's petroleum operations in the offshore waters may also refer to other use.

Document data

International classification (ICS): 75.020.
