What this standard covers

This standard specifies the technical requirements for the geologic design of reservoirs in conventional horizontal wellbore reservoirs in sandstone and carbonate reservoirs. The reservoir geologic design of the conventional horizontal well target in the glutinite and igneous reservoirs can be carried out according to this standard. This standard is applicable to single well reservoir geology design of conventional horizontal well in sandstone, glutenite, carbonate rock and igneous reservoir.

Document data

International classification (ICS): 75.020.

Chinese classification (CCS): E12.

Estimated length of the Chinese original: 15,126 words.
