What this standard covers

This standard specifies the general principles for the prevention of pool fire requirements, the selection of passive fire protection systems, and the use and maintenance of passive fire protection systems for onshore production facilities in the oil and gas industry. This standard applies to the protection of property damage caused by hydrocarbon pool fires in petroleum and petrochemical plants.

Document data

International classification (ICS): 75.180.10.

Chinese classification (CCS): E94.

Estimated length of the Chinese original: 46,487 words.

Adopted international standard: API RP 2218-2013, MOD.
