What this standard covers

This standard specifies the definition of petroleum tailings and specifies the evaluation indicators and evaluation methods for petroleum tailings. This standard is applicable to medium-high permeability clastic reservoirs, ordinary low-permeability clastic reservoirs, ultra-low permeability clastic reservoirs, special lithologic reservoirs and heavy oil thermal recovery oils that are self-operated domestically (including domestic cooperation). Calculation and evaluation of Tibetan oil tailings.

Document data

International classification (ICS): 75.020.

Chinese classification (CCS): E12.

Estimated length of the Chinese original: 11,151 words.
