What this standard covers

This standard specifies analytical methods for the determination of the chemical composition of natural gas and similar gases by laser Raman spectroscopy. This standard applies to the analysis of the range of natural gas components shown in Table 1, as well as the determination of one or several components in natural gas.

Document data

International classification (ICS): 75.060.

Chinese classification (CCS): E24.

Estimated length of the Chinese original: 6,637 words.
