What this standard covers

This standard specifies pollution control measures such as solid waste, waste water, exhaust gas and noise generated during unconventional oil and gas exploration operations. This standard is applicable to pollution prevention and control during the whole process of exploration, development, and production operation of four types of unconventional oil and gas, including shale gas, coalbed methane, tight oil and tight gas, including unconventional oil and gas projects, pre-drilling engineering, drilling engineering, and surface construction engineering. , Ground gathering and transportation engineering and oil and gas production process pollution prevention, supervision and management and ecological protection measures.

Document data

International classification (ICS): 75.100.

Chinese classification (CCS): E20.

Estimated length of the Chinese original: 11,162 words.
