8.1 Handling of the sample after the test
8.2 Evaluation of test results
8.3 Detection method
9 Test report
9.1 Description of test report
9.2 Test report content requirements
9.3 Requirements for standard samples

1 Foreword

T/CSAE 131-2020 was issued by China Society of Automotive Engineers on 29 May 2020 and took effect the same day.

The T/CSAE prefix marks a association standard, adopted voluntarily.

The document runs to 14 pages in English translation.

2 Scope Preview

This standard specifies the design steps for anti-corrosion, drainage and sealing of passenger car body-in-white, dry and wet divisions of each grading surface, and corrosive environment grades, and establish the selection principles of anti-corrosion drainage and sealing design and anti-corrosion process plan of the white body are discussed. This standard applies to the design of anti-corrosion drainage and sealing of the body-in-white of passenger cars, and the guidelines for the design of anti-corrosion drainage and sealing of the body-in-white of other models refer to this standard.

T/CSAE 131-2020 falls under ICS 43.040.60, in the field of road vehicle engineering.

This catalogue holds 51 other T/CSAE standards in that field.

In this catalogue, T/CSAE standards carry edition years from 2015 to 2020.

3 About this standard

Issued by: China Society of Automotive Engineers

English translation: about 14 pages

Chinese original: about 20,259 characters

4 Related standards

Standards on related subjects:

QC/T 1029-2016 - Polypropylene (PP) honeycomb board products for automobiles

QC/T 797-2008 - Material identification and marking of automotive plastic, rubber and thermoplastic elastomer parts

5 Classification and status

International classification (ICS): 43.040.60

Chinese Standard Classification (CCS): T 40

Prefix T/CSAE: association standard, adopted voluntarily.
