8.1 Handling of the sample after the test
8.2 Evaluation of test results
8.3 Detection method
9 Test report
9.1 Description of test report
9.2 Test report content requirements
9.3 Requirements for standard samples

1 Foreword

T/CSAE 60-2017 was issued by China Society of Automotive Engineers on 18 September 2017 and took effect the same day.

The T/CSAE prefix marks a association standard, adopted voluntarily.

The document runs to 10 pages in English translation.

2 Scope Preview

This standard specifies the testing items, testing procedures, test methods and testing procedures for the next-generation lithium-ion battery modules for pure electric cars (hereinafter referred to as battery modules) to guide the detection of battery modules for the next generation of pure electric cars. It provides the basis for the selection and rapid evaluation of the power battery for the next generation of pure electric cars and the design of the battery system. This standard applies to lithium-ion battery modules for pure electric passenger vehicles.

T/CSAE 60-2017 falls under ICS 43.120, in the field of road vehicle engineering.

This catalogue holds 51 other T/CSAE standards in that field.

In this catalogue, T/CSAE standards carry edition years from 2015 to 2020.

3 About this standard

Issued by: China Society of Automotive Engineers

English translation: about 10 pages

Chinese original: about 15,168 characters

4 Related standards

Standards on related subjects:

QC/T 247-2017 - Technical specifications for fuel gas systems of LPG vehicles

QC/T 245-2017 - Technical specifications for fuel gas systems of CNG vehicles

QC/T 674-2007 - Compressed natural gas solenoid valves for automobiles

5 Classification and status

International classification (ICS): 43.120

Chinese Standard Classification (CCS): T 47

Prefix T/CSAE: association standard, adopted voluntarily.
