What this standard covers

This standard specifies the centralized uninterruptible power supply (hereinafter referred to as UPS) and the battery pack technical requirements, inspection methods, inspection rules, marking, packaging, transportation and storage of the centralized power supply used in conjunction with the signal power supply screen in the railway signal power system equipment. . This section applies to the design, manufacture, inspection, use and maintenance of UPS and battery packs. This section does not apply to UPS power supplies that are separately set in system equipment such as signal centralized monitoring.

Document data

International classification (ICS): 45.020.

Chinese classification (CCS): S61.

Estimated length of the Chinese original: 19,181 words.
