9.5 Moisture-proof of Strain Gage

1 Foreword

TB/T 1906.3-2003 was issued by National Railway Administration on 12 March 2003 and has been in force since 1 September 2003.

It is one of 6 parts of the TB/T 1906 series.

The TB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the transverse end wall with a railroad flatcar atmospheric corrosion resistant cold-formed steel (hereinafter referred to as transverse end wall with cold-formed steel) section size, technical requirements, test methods, inspection rules, packaging, marking and quality certification and so on. This standard applies to hot-rolled steel strip in a continuous roller Cold formed steel production on the unit. Does not apply to drawing, stamping, bending, etc. to produce steel.

TB/T 1906.3-2003 falls under ICS 45.040; 77.140.70, in the field of railway engineering.

This catalogue holds 457 other TB/T standards in that field.

In this catalogue, TB/T standards carry edition years from 1973 to 2026.
