1 Foreword

TB/T 2658.20-2004 was issued by National Railway Administration on 23 October 2004 and has been in force since 15 January 2005.

It is one of 3 parts of the TB/T 2658 series.

The TB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the large-scale road maintenance machinery (hereinafter referred to as the "big machine") for ballast track bed operating conditions, work organization, working procedures and requirements and construction safety aspects. This standard applies to the use of large machines for track bed ballast operations, including handling mud pumping ballast. Large cleaning machine hooking pneumatic unloading cha car for the track bed ballast cleaning operations may refer to. This standard applies to road design speed of 160km/h and below the line.

TB/T 2658.20-2004 falls under ICS 45.120, in the field of railway engineering.

This catalogue holds 457 other TB/T standards in that field.

In this catalogue, TB/T standards carry edition years from 1973 to 2026.
