What this standard covers

This standard specifies the Railway Locomotive current and voltage sensors with the technical requirements, test methods, inspection rules and product logos, packaging, transportation and storage. This standard applies to rolling stock on DC, AC, pulse current or voltage flow measured current and voltage sensors. This standard is also applicable to the subway, light rail and other mass transit vehicles current and voltage sensors.

Document data

International classification (ICS): 29.280.

Chinese classification (CCS): S35.

Estimated length of the Chinese original: 16,173 words.

Supersedes the earlier edition TB/T 2763-1996; TB/T 2764-1996.
