Foreword

TB/T 30018.2-2026 is a recommended industry standard of the People's Republic of China in the Railway sector, approved and issued by the National Railway Administration on 4 February 2026, with effect from 1 September 2026.

It is administered by the Railway Industry Standardization Technical Centralized Unit for Operation Safety.

Classification: ICS 03.220.30; CCS S39.

1 Scope

TB/T 30018.2-2026 is the part of the railway rescue crane maintenance series that deals with routine maintenance. It sets out the technical requirements for the regular upkeep and inspection of rescue cranes, and it is meant to be used with the general part of the series.

It is used by railway rescue and emergency organizations, crane depots and maintenance workshops, and by the technical staff who schedule and supervise upkeep. The standard is voluntary, as the code carries the /T mark. It was approved by the National Railway Administration, with the Railway Industry Operation Safety Standardization Technical Centralized Unit in charge of its technical content. It was issued on 4 February 2026 and takes effect on 1 September 2026. It is a new standard.
