1 Foreword

TB/T 3035-2002 was issued by National Railway Administration on 9 February 2002 and has been in force since 1 July 2002.

The TB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 8 pages in English translation.

2 Scope Preview

This standard specifies the basic operation of passenger trains between the units and the basic operating units within the two data communication and selection principles. This standard is based on two kinds of communication networks: T-type and L-type, according to the train formation and communication time urgency level, select one of the user's train communication network constituted. This standard applies to railroad marshalling trains non-fixed and fixed-block trains.

TB/T 3035-2002 is filed under Chinese Standard Classification S71, in the field of railways.

This catalogue holds 1,254 other TB/T standards without an ICS number.

In this catalogue, TB/T standards carry edition years from 1973 to 2026.
