9.5 Moisture-proof of Strain Gage

1 Foreword

TB/T 3125-2005 was issued by National Railway Administration on 19 August 2005.

The TB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 8 pages in English translation.

2 Scope Preview

This standard specifies the railroad passenger car electric water unit (hereinafter referred to as warm water is) the conditions of use, the main technical parameters, technical requirements, test methods, inspection rules and signs, packaging, transportation, storage and so on. This standard applies to railroad passenger cars, locomotives and EMUs with warm water and the design, inspection and acceptance.

TB/T 3125-2005 falls under ICS 45.060.01, in the field of railway engineering.

This catalogue holds 457 other TB/T standards in that field.

In this catalogue, TB/T standards carry edition years from 1973 to 2026.

3 About this standard

Sector: Railway & Train Industry Standard (Recommended)

Issued by: National Railway Administration

English translation: about 8 pages (approximate)

Chinese original: about 9,982 characters
