What this standard covers

This standard specifies the product classification, technical requirements, inspection methods, inspection rules, marking, packaging, transportation and storage of galvanic connection for choke transformer with galvanized copper and twisted pair (hereinafter referred to as "connecting wire"). This standard applies to the design, production and inspection of the connecting lines between the midpoint of the two choke transformers in the electrified section track circuit and between the midpoint of the single choke transformer and the rail.

Document data

Chinese classification (CCS): S61.

Estimated length of the Chinese original: 9,945 words.

Supersedes the earlier edition TB/T 3205.2-2008.
