1 Foreword

TCSAE 48-2016 was issued by China Society of Automotive Engineers on 28 February 2016 and took effect the same day.

The TCSAE prefix marks a association standard, adopted voluntarily.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the terms and definitions, samples and their preparation, test equipment, test procedures, data processing, and test report contents in the test method for surface waviness of steel sheets for automobiles. This standard is applicable to the following aspects of the surface waviness test for automotive sheet steel: incoming inspection of automotive sheet steel raw materials, selection of new product design, approval of new automotive sheet materials, material technology cost reduction materials and surface waviness ratio For the test.

TCSAE 48-2016 falls under ICS 43.120, in the field of road vehicle engineering.

This catalogue holds 32 other TCSAE standards in that field.

In this catalogue, TCSAE standards carry edition years from 2015 to 2020.

3 About this standard

Issued by: China Society of Automotive Engineers

English translation: about 15 pages

Chinese original: about 22,255 characters

4 Related standards

Standards on related subjects:

QC/T 1029-2016 - Polypropylene (PP) honeycomb board products for automobiles

QC/T 797-2008 - Material identification and marking of automotive plastic, rubber and thermoplastic elastomer parts

5 Classification and status

International classification (ICS): 43.120

Chinese Standard Classification (CCS): T 40

Prefix TCSAE: association standard, adopted voluntarily.
