What this standard covers

This standard specifies heat treatable carbon steel sheets and steel strips for automobiles (hereinafter collectively referred to as "steel sheets and strips". When distinguishing, they are called hot-rolled steel sheets and strips, cold-rolled steel sheets and strips, and cold-rolled narrow strips. The grade and classification, size, shape, technical requirements and tests. This standard is applicable to carbon steel plates and steel strips used in heat-treated parts with certain hardness and special wear resistance in the production vehicles of automobile enterprises. (Steel plates and steel strips are used without heat treatment after molding. It is recommended to use the national standard).

Document data

International classification (ICS): 43.120.

Chinese classification (CCS): T40.
