## Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009.

This standard by the National Land Resources Standardization Technical Committee and centralized.

This standard is mainly drafted by. Land and Resources Ministry of land remediation center.

Participated in the drafting of this standard. China University of Geosciences (Beijing),

Beijing Mining and Metallurgical Research Institute, China University of Mining (Beijing).

## Introduction

To standardize the production and construction activities and natural disasters damaged land reclamation work, improve the quality of land reclamation implementation, promote land reclamation management Institutionalized and standardized construction, according to "Land Administration Law of the People's Republic of China", "Land Reclamation Ordinance" and the relevant laws, regulations, policies and Technical standards, the development of "land reclamation quality control standards." Land reclamation quality control standards

## 1 Scope

This standard specifies the following technical requirements for the destruction of land reclamation and should meet the quality requirements.

- Open-pit mining, burning brick and tile, digging sand and other land surface excavation damaged by the land;
- Underground mining caused land surface collapse of the land;
- Piled up mining stripping, waste rock, slag, fly ash, smelting slag and other solid waste occupied land;
- Temporary occupation of damaged land by energy, transportation, water conservancy and other infrastructure construction and other production and construction activities;
- floods, geological disasters and other natural disasters damaged land;
- Laws of other production and construction activities caused damage to the land.

This standard applies to land reclamation planning, compilation of land reclamation plan, land reclamation project planning and design and acceptance activity.

## 2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version applies to this article Pieces. For undated references, the latest edition (including all amendments) applies to this document.
