What this standard covers

This standard stipulates the technical content and requirements of the investigation, evaluation, stripping, storage, transportation and reply in the soil stripping and utilization activities of the tillage layer, and the content of the soil stripping and utilization scheme of the tillage layer. This standard is applicable to the soil stripping and utilization activities of the tillage layer involved in construction occupation, temporary land use, and land remediation. The provinces may, in conjunction with local conditions, formulate provincial-level technical specifications in accordance with the provisions of this standard.
