Table of Contents

1 General provisions
1.1 Purpose
1.2 Application scope
1.2.1 Manufacture supervision inspection
1.2.2 Construction supervision inspection
1.3 Basic requirements
1.4 Inspected organizations
1.5 Supervision inspection organization and personnel
1.6 Management requirements
2 General requirements
2.1 Supervision inspection procedures
2.1.1 Acceptance of applications
2.1.2 Preparation for supervision inspection
2.1.3 Implementation of supervision inspection
2.1.4 Issuance of supervision inspection certificates
2.2 Contents and methods of supervision inspection
2.2.1 Contents of supervision inspection
2.2.2 Methods of supervision inspection

1 Foreword

TSG D7006-2020 was issued by State Administration for Market Regulation on 16 May 2020.

In October 2014, the Special Equipment Safety Supervision Bureau (hereinafter referred to as "the SESSB") of the former General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China (hereinafter referred to as "the former AQSIQ") issued the revision assignment of Pressure pipe installation supervision inspection regulation (hereinafter referred to as the Installation supervision inspection regulation).

In April 2015, China Special Equipment Inspection and Research Institute organized relevant experts to set up a drafting group and held the first meeting in Guangzhou to discuss the principles, key contents and main problems to be solved in the revision of the Installation supervision inspection regulation, and to make specific arrangement for the revision work and formulate the revision work schedule.

In November 2015, the drafting group held the second meeting in Beijing to discuss and revise the draft, and an exposure draft was formulated. In April 2016, the SESSB issued ZHIJIANTEHAN [2016] No.13 to solicit opinions from basic-level departments, organizations concerned, experts and the public. In August 2016, the drafting group held the third meeting in Beijing to study and discuss the opinions received, and the draft for review is formulated through revision.

In May 2017, the SESSB submitted the draft for review to the Special Equipment Safety and Energy Saving Technical Committee of the former AQSIQ for review, and then the draft for approval is formulated by the drafting group through revision based on the review opinions.

With the transformation of government functions and the advancement of administrative licensing reform, the drafting group added the relevant contents on pressure pipe unit manufacture supervision inspection as required by the SESSB in the Regulation so as to coordinate with the Announcement of the State Administration for Market Regulation on matters related to administrative licensing of special equipment [2019] No.3 and the Regulation for production and filling licensing of special equipment (TSG 07-2019). In April 2019, the fourth meeting was held to discuss the relevant contents on pressure pipe unit manufacture supervision inspection added in the Regulation, and the Pressure pipe supervision inspection regulation (TSG D7006-2020) (hereinafter referred to as the Supervision inspection regulation) was formulated as a draft for approval after revision.

2 Scope Preview

TSG D7006-2020 carries no ICS number and no Chinese Standard Classification code.

This catalogue holds 142 other TSG standards.

In this catalogue, TSG standards carry edition years from 2004 to 2025.

3 About this standard

Sector: Special Equipment

Issued by: State Administration for Market Regulation

English translation: about 15 pages (approximate)

4 Classification and status

Prefix TSG: mandatory standard.
