3 Terms and Definitions

The terms and definitions defined in GB/T 18354, GB/T 23824.1 and the following apply to this document.

Data elements shared by multiple information systems during data exchange in emergency logistics activities.

4.1 Emergency Logistics Action Identification Code (YJWL0001)1)

The attributes of the data element are described as follows.

---Data element name. emergency logistics action identification code;

---Data element identifier. YJWL0001;

---Data element abbreviation. action code;

---Data element definition. the global unique identification code of emergency logistics actions taken in response to public emergencies;

---Data metadata type. string;

---Data metadata format. 12-byte fixed-length text;

---The unit of measurement of the data element value. -2);

---Data element value field.-;

1) YJWL is the first letter of the pinyin of emergency logistics.

2) One word line, the following all indicate that no specific content is involved here.
