What this standard covers

This standard specifies the range of electronic continuity resources, the description of objects, the relationship between the description of the object, established the electronic continuity of the metadata specification element set and expansion rules, and the detailed definition of the elements and their modifiers. This standard specifies the content and appearance characteristics of electronic continuity resources (including primary and derived electronic continuity resources). This standard is designed primarily for generic elements of electronic continuity resources, such as the need to describe specific types of Elements that can be extended on the basis of this standard metadata framework.
