What this standard covers

This standard specifies the set of specialized metadata elements describing the content and appearance of ancient books, as well as the general methods of locating and managing ancient books. This standard does not specialize in the management information and technical information of ancient books. If applicable, you can apply the appropriate management metadata specification or save the elements specified in the metadata specification. This standard also does not specify the analysis, design and implementation techniques of the archaeological resource metadata set associated with a particular system. This standard applies to the ancient books that describe the conversion of ancient objects into digital form, and can also be used to describe the ancient materials of the original form of paper. This standard is intended for use by cultural information agencies, and other areas of information resources may be used directly or as amended, subject to the basic principles and the principles of expansion of this document.
