What this standard covers

This standard stipulates the scope of the degree thesis, the object of the description, the relationship between the objects, establishes the element set and the expansion rule of the resource specification of the degree thesis, and defines the element and its modifier in detail. This standard is designed primarily for the generic elements of the dissertation resources. If you need to describe the elements of a particular group, you can extend it on the basis of this standard metadata framework. This standard applies to master degree thesis and doctoral dissertation.
