What this standard covers

This standard specifies the indicators and methods for determining endemic arsenic poisoning areas and classifying severity. This standard is applicable to the determination and division of drinking water-type and coal-burning pollution-type endemic arsenic poisoning wards based on administrative villages.

Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C61.

Estimated length of the Chinese original: 5,592 words.

Supersedes the earlier edition WS 277-2007.
