What this standard covers

This standard specifies the procedures, method steps and technical content guidance for deriving reference doses of environmental chemical pollutants with the goal of protecting human health. This standard is applicable to the derivation of reference doses for single environmental chemical pollutants that can cause threshold toxic effects to cause acute or chronic harmful effects on humans through different exposure pathways.

Document data

International classification (ICS): 13.020.

Chinese classification (CCS): C51.

Estimated length of the Chinese original: 43,488 words.
