1 Foreword

WS/T 10023-2024 was issued by National Health Commission on 11 October 2024 and has been in force since 1 March 2025.

The WS/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the safe guidance value of urine fluoride content for children and adults in non-endemic fluorosis areas. This standard is applicable to the determination of endemic fluorosis areas, control effect evaluation and population exposure status evaluation.

WS/T 10023-2024 falls under ICS 11.020, in the field of health care technology.

This catalogue holds 489 other WS/T standards in that field.

In this catalogue, WS/T standards carry edition years from 1996 to 2026.
