What this standard covers

This standard specifies the health information data element model, attributes, naming, definition, and classification of health information data elements, as well as the standard writing format of health information data element content. This standard applies to the research and formulation of the health information data element catalog (data element dictionary), the design and development of the health information data element metadata registration system, and the research, teaching and exchange of health information standards.

Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C07.

Estimated length of the Chinese original: 23,277 words.

Supersedes the earlier edition WS/T 303-2009.
