### What this standard covers

This standard specifies the data set metadata content framework, health and health information data set core metadata, health and health information data set reference metadata, citation information and code table. This standard is applicable as a unified and standardized description of the attributes of health information data sets, and can also be used as the basis for developing special metadata standards for data sets in the health field.

### Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C07.

Estimated length of the Chinese original: 29,226 words.

Supersedes the earlier edition WS/T 305-2009.
