### What this standard covers

This standard specifies the determination of alkaline phosphatase (ALP) concentration of the catalytic activity of the reference method. This standard applies to the reference laboratory, as measured by the concentration of alkaline phosphatase catalytic activity of the source, but also as the catalytic activity of the enzyme concentration testing instruments and reagents related to production enterprises source, available to the authorized unit and the application of quality management department.

### Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C50.

Estimated length of the Chinese original: 27,272 words.

Adopted international standard: JCTLM "IFCC 37?? enzymatic activity level reference method for measuring the concentration of the original 9: Determination of the concentration of alkaline phosphatase catalytic reference method ", MOD.
