What this standard covers

This standard specifies the reference method for detecting the minimum inhibitory concentration (MIC) of anti-filamentous fungi by micro- and macro-broth dilution method. This standard is applicable to the drug sensitivity test of spore-forming filamentous fungi that cause deep fungal infections, including certain species of *Aspergillus* spp. and species complexes, certain species of *Fusarium* spp. and species complexes, certain species of *Rhizopus* spp. and *Mucorales* (Zygomycetes), *Lomentospora prolificans*, formerly *Duoyu Saiduo*

Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C50.

Estimated length of the Chinese original: 25,270 words.

Supersedes the earlier edition WS/T 411-2013.
