Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009.

This standard is mainly drafted by. Ninth People's Hospital Affiliated to Shanghai Jiaotong University School of Medicine.

Participated in the drafting of this standard. Chinese Stomatological Association, Stomatological Hospital of Peking University, Stomatological Hospital of Capital Medical University, Sichuan University, West China Dental Hospital, Stomatological Hospital of Wuhan University, Affiliated Stomatological Hospital of Sun Yat-sen University, Stomatological Hospital of Southern Medical University, Dental Hospital of Yangpu District, Shanghai Governance

1 Scope

This standard specifies the basic inspection methods in oral health surveys, evaluation criteria, record code and recording methods.

This standard applies to the national or local population-oriented oral health survey or disease monitoring, according to different survey purposes Choose a different check.

2 Abbreviations

The following abbreviations apply to this document.

CEJ. Cemento-Enamel Junction CPI. Community Periodontal Index (Community Periodontal Index) DAI. Dental Aesthetic Index

3.1 Check the content

Check the mucosa for the presence of oral cancer, oral leukoplakia, oral lichen planus, oral ulcers, oral candidiasis, abscesses or other conditions.

Proceed in the following order. lip red, mouth angle, lip mucosa, labial groove, buccal mucosa, tongue, mouth bottom, hard palate, soft palate, alveolar ridge and gums.

3.2 Inspection equipment

Flat mouth mirror, disposable medical cleaning gloves and lighting.

3.3 Inspection methods

Under the artificial light source, the oral soft tissues are pulled by the plane-shaped endoscope and the finger, and the inspection is performed by the method of palpation and palpation.

3.4.1.1 No abnormalities

Oral mucosa is moist, smooth, continuous, flexible, soft, pink.

3.4.1.2 Oral cancer

Oral red or white proliferative mass or ulcer, often like cauliflower or strawberry-like, palpable basal body hard.

3.4.1.3 Oral leukoplakia

Occurs in the oral mucosa can not be erased, can not be diagnosed with other diseases of the white plaque.

3.4.1.4 Oral lichen planus

Oral mucosal meshlike pattern lesions. More common in the buccal mucosa and gingival cheek migration groove, the lesions often showed symmetry.
