What this standard covers

This standard specifies the technical requirements of the conventional method for the detection of serum 25-hydroxyvitamin D2 and 25-hydroxyvitamin D3 - isotope dilution liquid chromatography tandem mass spectrometry, including reagent preparation, sample preparation, instrument detection, data analysis, etc. This standard is applicable to the detection of serum 25-hydroxyvitamin D2 and 25-hydroxyvitamin D3 by isotope dilution liquid chromatography tandem mass spectrometry in clinical laboratories of medical institutions.

Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C50.

Estimated length of the Chinese original: 11,146 words.

Supersedes the earlier edition WS/T 478-2015.
