What this standard covers

This standard specifies the method of inductively coupled plasma mass spectrometry (ICP-MS) for the analysis of uranium total uranium and uranium-235/uranium-238 ($^{235}\text{U}/^{238}\text{U}$) ratios. This standard is applicable to the measurement of uranium total uranium and $^{235}\text{U}/^{238}\text{U}$ ratio, other biological samples of the total uranium and $^{235}\text{U}/^{238}\text{U}$ ratio analysis can refer to this standard.

Document data

International classification (ICS): 13.280.

Chinese classification (CCS): C57.
