### What this standard covers

This standard specifies the methods, content and database requirements for information entry and information linking when pre-hospital emergency agencies transfer severe trauma patients from pre-hospital to the receiving hospital. This standard applies to the handover of condition information of severely traumatized patients between medical staff in all types of pre-hospital emergency facilities at all levels across the country and medical staff in receiving hospitals.

### Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C05.

Estimated length of the Chinese original: 14,118 words.
