What this standard covers

This standard specifies the conversion coefficients from radiation field quantity to protection quantity in external radiation protection against photons, neutrons, electrons, positrons, protons, negative muons, positive muons, negative pions, positive pions and helium ions, and the conversion coefficients from radiation field quantity to practical quantity in external radiation protection against photons and neutrons.

Document data

International classification (ICS): 13.280.

Chinese classification (CCS): C57.

Estimated length of the Chinese original: 139,177 words.
