What this standard covers

This standard specifies the requirements, layout and facilities, transplant patient placement, hospital infection monitoring, and transplant recipient infection prevention for hospital infection prevention and control in organ transplant wards. This standard applies to medical institutions with organ transplant wards (such as liver transplant, kidney transplant, heart transplant, etc.), but not to medical institutions engaged in the donation and transplantation of human cells and human tissues such as cornea and bone marrow.

Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C05.

Estimated length of the Chinese original: 7,783 words.
