What this standard covers

This standard specifies the general requirements, pre-examination preparation, examination procedures, and diagnostic requirements, positioning design, and imaging technical requirements for digital radiography (DR) examinations conducted by township health centers and community health service centers. This standard applies to common DR examinations conducted by primary healthcare institutions such as township health centers and community health service centers. The common DR examination techniques in this standard are general requirements for imaging examination operations, and other institutions may refer to them for implementation. Institutions conducting computed tomography (CR) examinations may refer to this standard for implementation.
