What this standard covers

This standard specifies the general requirements, pre-examination preparation, examination procedures, technical requirements for common CT examinations, image processing and print printing, and image quality requirements for X-ray computed tomography (CT) examinations conducted by township health centers and community health service centers. This standard applies to common plain CT scan examinations performed in primary healthcare institutions such as township health centers and community health service centers. The common CT examination techniques in this standard represent general requirements for imaging examination operations, and other institutions may refer to them for implementation.
