Foreword

WS/T 888-2026 is a recommended industry standard of the People's Republic of China in the Health sector, approved and issued by the National Health Commission on 28 February 2026, with effect from 1 September 2026.

Classification: ICS 11.020; CCS C05.

1 Scope

WS/T 888-2026 is a technical operation standard for comprehensive geriatric assessment in medical institutions. Comprehensive geriatric assessment is a multi-dimensional evaluation of an older person's health and functional status, and the document deals with how it is carried out in practice by hospitals and similar institutions.

It is used by geriatric departments, hospitals and other medical institutions that assess older patients, by the physicians, nurses and rehabilitation staff who perform the assessment, and by health administrators who set up such services. It is a voluntary standard, as shown by the /T in its code. It was approved by the National Health Commission, issued on 28 February 2026 and takes effect on 1 September 2026. It is a new standard.
