Foreword

WS/T 892-2026 is a recommended industry standard of the People's Republic of China in the Health sector, approved and issued by the National Health Commission on 17 March 2026, with effect from 1 September 2026.

Classification: ICS 11.020; CCS C05.

1 Scope

WS/T 892-2026 is a standard for the establishment of an electrocardiogram diagnostic centre within a tightly integrated county-level health services entity. Such an entity links the county hospital with township and village facilities, and the centre provides ECG diagnosis for the whole group.

It is used by county hospitals and health service entities that set up or run a shared ECG diagnostic centre, by health administrations that plan regional medical resources, and by managers and cardiology and diagnostic staff involved in its establishment. It is a voluntary standard, as shown by the /T in its code. It was approved by the National Health Commission, issued on 17 March 2026 and takes effect on 1 September 2026. It is a new standard.
