What this standard covers

This standard specifies quality control requirements for the preservation processes??including receipt, identification, cataloging, preparation, storage, resuscitation, external provision, and destruction??of pathogenic microorganism strains (and viral strains) infectious to humans. This standard applies to institutions preserving such pathogenic microorganism strains (and viral strains); units involved in the custody and use of these strains may use it as a reference.

Document data

International classification (ICS): 11.020.

Chinese classification (CCS): C05.

Estimated length of the Chinese original: 10,196 words.
