What this standard covers

This standard specifies the content and requirements for various stages of radiation epidemiological surveys among occupational groups, including survey design, implementation, data organization and analysis, reporting, and quality control. It applies to retrospective radiation epidemiological surveys conducted by entities utilizing nuclear technology and involving personnel working with associated radioactive minerals; retrospective surveys for other occupational groups may refer to this standard.

Document data

International classification (ICS): 13.280.

Chinese classification (CCS): C57.

Estimated length of the Chinese original: 20,276 words.
