What this standard covers

This standard specifies the classification, technical requirements, test methods, inspection rules, marking, packaging, transportation, storage and accompanying documents of gadolinium ferroalloys. This standard applies to gadolinium-iron alloys produced by electrolysis and fusion methods, and is mainly used for the preparation of rare earth permanent magnet materials such as neodymium iron boron.

Document data

International classification (ICS): 77.120.99.

Chinese classification (CCS): H65.

Estimated length of the Chinese original: 6,684 words.
