What this standard covers

This standard specifies the requirements, test methods, inspection rules and signs, packaging, transportation, storage and quality certificates of bismuth iron alloy. This standard is applicable to the ferroniobium alloy produced by the electrolysis method and the fusion method. It is mainly used for the additives of steel, the spheroidizing agent of ductile iron, the creeping agent of compacted graphite iron, and the additive of alloy cast iron.

Document data

International classification (ICS): 77.120.99.

Chinese classification (CCS): H65.

Estimated length of the Chinese original: 663 words.
