What this standard covers

This standard specifies the determination method of carbon content in gadolinium-magnesium alloy. This standard applies to the determination of carbon content in gadolinium-magnesium alloys. The measurement range is: 0.010%-0.30%.

Document data

International classification (ICS): 77.120.99.

Chinese classification (CCS): H14.

Estimated length of the Chinese original: 7,732 words.
