What this standard covers

This standard specifies the determination method of calcium, magnesium, aluminum and manganese in gadolinium iron alloy. This standard is applicable to the determination of calcium, magnesium, aluminum, and manganese in iron alloys. The measurement range is shown in Table 1.

Document data

International classification (ICS): 77.120.99.

Chinese classification (CCS): H14.

Estimated length of the Chinese original: 1,118 words.
