What this standard covers

This standard specifies the general principles, evaluation requirements, evaluation procedures and evaluation reports for the evaluation of green plants for rare earth pyrometallurgy. This standard is applicable to the green factory evaluation of enterprises or enterprise production units engaged in the production of molten salt electrolysis, metal thermal reduction, reduction distillation, and refining and purification of rare earth metals and rare earth alloys. This standard does not apply to the green factory evaluation of enterprises or enterprise production units engaged in rare earth fluorides, rare earth ferrosilicon alloys, rare earth magnesium ferrosilicon alloys, and neodymium iron boron alloys.

Document data

International classification (ICS): 77.120.99.

Chinese classification (CCS): H01.

Estimated length of the Chinese original: 28,240 words.
